PROFESSIONAL SUMMARY

I'm a Computer Systems Technician graduate looking to land my first formal helpdesk or service desk role, backed by a self-hosted multi-OS home lab where I troubleshoot Windows, Linux, and macOS every day. My paid background in data analysis, scheduling, and customer service has me comfortable documenting processes, supporting end users, and building automations that save teams hours each week. I don't yet have hands-on Active Directory, Microsoft 365 administration, or enterprise ticketing experience, but I'm eager to build those on the job, and I support users in both English and Cantonese.

SKILLS

Computer Systems: Operating systems (Windows, Linux, macOS); systems and OS-level troubleshooting; container orchestration (Docker); centralized storage (TrueNAS, ZFS)

Software Proficiency: Microsoft Office Suite; Microsoft Dynamics GP; remote and multi-OS support

Scripting & Automation: Bash (Beginner), PowerShell (Beginner), Python (Beginner), SQL (Beginner), JavaScript (Beginner), HTML (Beginner), CSS (Beginner); Git; Homebrew

EDUCATION

Advanced Diploma - Computer Systems Technician September 2017 - April 2020

Centennial College | Toronto, ON

Languages: English (Native), Cantonese (Fluent)

PROJECTS

Self-Hosted Infrastructure & Virtualization Home Lab Personal Project

Technologies: Docker Compose, TrueNAS, ZFS, Debian, Arch Linux, Windows 11, macOS, UPS automation (NUT).

- Manage full lifecycle operations across Debian, Arch Linux, Windows 11, and macOS, including kernel patching, security hardening, and day-to-day OS-level troubleshooting.
- Architected a high-availability home network and lab environment to host containerized microservices and centralized storage.
- Configured a centralized TrueNAS environment with ZFS storage pools, protecting data integrity through automated snapshots and backup policies.
- Deployed and orchestrated multi-container stacks with Docker Compose, keeping application deployments consistent and repeatable.
- Integrated a centralized UPS with automated shutdown scripts to protect filesystem integrity during power anomalies.

WORK EXPERIENCE

Document Scanning Clerk | Union Digital Inc. | Toronto, ON November 2023 - Present

- Partnered with the team and leadership to optimize workflows, cutting document digitization turnaround time by 33%.
- Mentored 2+ new team members through onboarding, delivering structured process guidance and hands-on support.

Purchasing Assistant / Junior Data Analyst | Amphenol CTI | Toronto, ON June 2023 - September 2023

- Cut system load times 70% by designing team-specific reports, eliminating unnecessary broad-database queries and unused tables.
- Built an Excel/Word/Outlook automation for vendor order-update emails, saving roughly 10 hours of manual prep each week while keeping it usable for the team.
- Developed a unified reference report that served as a single source of truth for meetings, follow-ups, and decisions across departments.

Customer Service and Scheduling Clerk | Amphenol CTI | Toronto, ON January 2022 - May 2023

- Built a Dynamics GP & Excel automation for customer order entry, reducing manual data input time by 75% and letting teammates process orders independently.
- Created a daily summary report tracking orders, shipments, and inventory status for team-lead end-of-day reviews.

Warehouse Clerk | Amphenol CTI | Toronto, ON September 2021 - December 2021

- Created a VLOOKUP-powered lookup tool that answered other departments' warehouse queries directly, saving about 10 hours/week of manual gathering and email coordination.

Data Security Analyst / Data Entry | Epiq Global | Toronto, ON June 2021 - July 2021

- Reviewed customer documents to identify personal or sensitive information that had been compromised in a data breach.
- Recorded the compromised details and assigned a severity level to flag each document by importance.

Receptionist | Apexx Injury Rehab Centre | Toronto, ON May 2019 - December 2019

- Booked appointments for new and existing patients and managed the daily schedule.
- Billed visits and kept track of statements of account.
- Supported physiotherapists with patient records and documented patient condition.
